

DUBAI POLICE INTELLIGENCE DIVISION

CASE FILE: OPERATION RED FALCON // ASSASSINATION ANALYSIS

Case Ref: **DXB-2010-8842-CID**

Date of Incident: **Jan 19, 2010**

Classification: **TOP SECRET / DEMO**

Target: **Mahmoud al-Mabhouh (E-001)**

Location: **Room 230, Al Bustan Rotana**

Operative Count: **26 Confirmed Hits**

1. EXECUTIVE CASE SUMMARY

On January 19, 2010, senior Hamas operative Mahmoud al-Mabhouh arrived at Dubai International Airport (DXB) at 14:00 local time. Within five hours of checking into Room 230 at the Al Bustan Rotana Hotel, he was targeted and executed by a highly sophisticated, 26-member foreign hit squad operating under forged European and Australian identities.

The operation represents a masterclass in counter-intelligence compartmentalization. The perpetrators operated in distinct sub-units (Airport Trackers, Mall Surveillance, Hotel Execution, Logistics, and Escapes) and maintained strict physical isolation. No team member placed direct phone calls to another team member within the United Arab Emirates. Instead, the entire operational network was coordinated remotely via an international telecom hub in Austria.

CRITICAL INVESTIGATIVE BREAKTHROUGH

Standard surveillance and localized call detail records (CDRs) yielded zero connections between suspects on the ground. The breakthrough was achieved by deploying multi-modal network graph analysis—combining spatial-temporal CCTV spottings, automated border control logs, international telecom relay analysis, and prepaid financial transaction clustering.

2. POLICE INCIDENT REPORTS (FIR SUMMARY)

The initial investigation produced four primary First Information Reports (FIRs) capturing the crime scene, forensic findings, border control anomalies, and telecom intercepts:

FIR ID	DATE & TIME	REPORTING UNIT	INCIDENT TYPE	KEY FINDINGS / ACTION
FIR-2010-001	2010-01-20 13:30	Deira CID Division	Unexplained Death	Victim found dead in Room 230. Room locked from inside with latch attached. Initial appearance suggested natural cardiac arrest.
FIR-2010-002	2010-01-21 09:15	Forensic Science Div.	Homicide / Poisoning	Toxicology detected <i>succinylcholine</i> (rapid muscle relaxant causing asphyxiation). Door lock audit revealed electronic override via key card duplicator.
FIR-2010-003	2010-01-22 16:45	Customs & Border Ctrl	Passport Fraud	Audit flagged 26 European/Australian cloned passports entering DXB 24–48 hrs prior and departing within 4 hours post-incident. Interpol Red Notices requested.
FIR-2010-004	2010-01-24 11:00	Telecom Intelligence	Covert Comms Intercept	TRA audit uncovered 26 burner numbers making zero local calls, exclusively transmitting encrypted micro-bursts to an Austrian landline (+43100000000).

3. OPERATIVES & IDENTITY MATRIX (26 SUSPECTS)

The 26 suspects utilized fraudulently cloned passports issued under UK, French, German, and Australian jurisdictions. The table below outlines the core team, their assigned roles, and operational movements:

ID	ALIAS / NAME	PASSPORT REF	OPERATIONAL ROLE	ORIGIN FLIGHT	EXIT DESTINATION
E-002	Kevin Daveron	PASS-IRL-102 (IRL)	Hit Team Leader	Paris (CDG)	Zurich (ZRH)
E-003	Gail Folliard	PASS-IRL-103 (IRL)	Airport Tracker	Frankfurt (FRA)	Rome (FCO)
E-004	Evan Dennings	PASS-AUS-104 (AUS)	Execution Squad	Rome (FCO)	Hong Kong (HKG)
E-005	Command Hub	N/A (Vienna Landline)	Communications Relay	Vienna, Austria	N/A
E-006	Peter Elvinger	PASS-FRA-201 (FRA)	Logistics Coordinator	Paris (CDG)	Johannesburg (JNB)
E-007	Michael Bodenheimer	PASS-GER-202 (GER)	Downtown Lookout	Munich (MUC)	Doha (DOH)
E-008	James Clarke	PASS-UK-203 (UK)	Airport Surveillance	London (LHR)	Bangkok (BKK)
E-009	Stephen Drake	PASS-UK-204 (UK)	Taxi Tracker	London (LGW)	Milan (MXP)
E-010	Paul Keeley	PASS-UK-205 (UK)	Hotel Lobby Watch	Manchester (MAN)	Paris (CDG)
E-011	Jonathan Louis	PASS-UK-206 (UK)	Execution Squad	London (LHR)	Hong Kong (HKG)
E-012	Melvyn Mildiner	PASS-UK-207 (UK)	Extraction Driver	London (LHR)	Frankfurt (FRA)
E-013	Colin Berry	PASS-UK-208 (UK)	Secondary Extraction	Birmingham (BHX)	Amsterdam (AMS)
E-014	Mark Daniel	PASS-UK-209 (UK)	Corridor Lookout	London (LHR)	Zurich (ZRH)
E-015	Daniel Schnur	PASS-GER-210 (GER)	Stairwell Guard	Frankfurt (FRA)	Vienna (VIE)
E-016	Nicole Cleary	PASS-AUS-211 (AUS)	Mall Tracker (Wafi)	Sydney (SYD)	Kuala Lumpur (KUL)
E-017	Roy Cannon	PASS-UK-212 (UK)	Comms Specialist	London (LHR)	Athens (ATH)
E-018	Bruce Joshua	PASS-AUS-213 (AUS)	Execution Squad	Melbourne (MEL)	Hong Kong (HKG)
E-019	Adam Korman	PASS-AUS-214 (AUS)	Elevator Watch	Perth (PER)	Singapore (SIN)
E-020	Joshua Daniel	PASS-AUS-215 (AUS)	Ticketing / Finance	Sydney (SYD)	Bangkok (BKK)
E-021	Alexander Klein	PASS-GER-216 (GER)	Mall Tracker (Deira)	Berlin (TXL)	Istanbul (IST)
E-022	Christian Zimmermann	PASS-GER-217 (GER)	Hotel Perimeter	Hamburg (HAM)	Vienna (VIE)
E-023	Michael Lawrence	PASS-UK-218 (UK)	Garage Surveillance	London (LHR)	Cairo (CAI)
E-024	Marc Sklar	PASS-UK-219 (UK)	Primary Rental Driver	London (LHR)	London (LHR)

ID	ALIAS / NAME	PASSPORT REF	OPERATIONAL ROLE	ORIGIN FLIGHT	EXIT DESTINATION
E-025	David Bernard	PASS-FRA-220 (FRA)	Secondary Driver	Nice (NCE)	Paris (CDG)

4. TELECOM ANALYSIS: THE AUSTRIAN COMMAND HUB

Standard telecommunication analysis assumes local conspiracy members will call or text each other directly. In this case, cellular frequency logs across all UAE towers confirmed **zero intra-network communications** among the burner numbers.

NETWORK TOPOLOGY: HUB-AND-SPOKE

Every operative was issued an encrypted GSM handset programmed to dial a single international number: **+431000000000** (Vienna, Austria). The Austrian hub acted as an automated switchboard and command center, receiving status updates from field spotters and instantly relaying execution orders to the hotel team.

Key Intercept Sequence (Jan 19, 2010):

TIME (LOCAL)	ORIGIN / CALLER	RECIPIENT	DURATION	OPERATIONAL CONTEXT
14:00:00	Gail Folliard (+971550000003)	Austria Hub (+431000000000)	45s	Target landed at DXB. Airport team confirms identification.
14:05:00	Austria Hub (+431000000000)	Kevin Daveron (+971550000002)	120s	Relaying target arrival to Hit Team Leader.
15:00:00	Peter Elvinger (+971550000005)	Austria Hub (+431000000000)	60s	Room 237 successfully booked opposite target's Room 230.
16:20:00	Nicole Cleary (+971550000015)	Austria Hub (+431000000000)	10s	Target spotted leaving Wafi Mall returning to hotel.
19:47:00	Austria Hub (+431000000000)	Jonathan Louis (+971550000010)	15s	Execution greenlight: Target entered elevator to 2nd floor.
20:25:00	Kevin Daveron (+971550000002)	Austria Hub (+431000000000)	15s	Hit completed. Execution team vacating hotel premises.

5. FINANCIAL INTELLIGENCE & PREPAID CARD AUDIT

The hit squad attempted to obscure financial linkages by utilizing prepaid debit cards issued in the United States and funding hotel bookings via foreign online processing gateways.

FINANCIAL CLUSTER ANALYSIS

By ingesting merchant gateway logs from *PayMate* and credit card issuer BIN numbers, intelligence software identified two primary card clusters:

- BIN Cluster 1 (4532-XXXX):** Issued by *MetaBank USA Prepaid*. Used for hotel room deposits, airline tickets, and cash advances. All cards resolved to billing hash **HASH-US-MIAMI-882**.
- BIN Cluster 2 (5200-XXXX):** Issued by *PayPower MasterCard US*. Used for car rentals (Sixt/Hertz) and burner hardware purchases at Du kiosks. All resolved to billing hash **HASH-US-DELAWARE-401**.

6. GEOSPATIAL SURVEILLANCE & MULTI-SITE SPOTTINGS

The power of the platform lies in proving that suspects physically dispersed across Dubai were acting in complete coordination:

TIMESTAMP	SURVEILLANCE SOURCE	ENTITY SPOTTED	GEOGRAPHIC ZONE	BEHAVIORAL OBSERVATION
Jan 18 09:30	Immigration DXB T1	Peter Elvinger (E-006)	Airport Zone	Arrives from Paris; pays for room with MetaBank prepaid card.
Jan 18 11:00	CCTV Jumeirah Hotel	M. Bodenheimer (E-007)	Downtown Zone	Checks into secondary hotel; maintains distance from Al Bustan.
Jan 19 13:30	CCTV Sixt Counter	Marc Sklar (E-024)	Airport Rental Zone	Rents Audi getaway vehicle using PayPower card.
Jan 19 14:10	CCTV DXB Terminal 1	Stephen Drake (E-009)	Airport Arrivals	Tails target from taxi stand; dials Austrian hub (C-203).
Jan 19 16:30	CCTV Wafi Mall	Alexander Klein (E-021)	Retail Zone	Observed trailing target through shopping center.
Jan 19 19:45	CCTV Al Bustan Elevator	Jonathan Louis (E-011)	Crime Scene Zone	Enters floor wearing disguise and carrying tennis gear.
Jan 19 22:45	Immigration DXB T3	Jonathan Louis (E-011)	Airport Exit Zone	Boards flight to Hong Kong less than 3 hours post-hit.

7. PLATFORM LIVE DEMO STRATEGY & QUERY PLAYBOOK

Use this step-by-step workflow during the live presentation to demonstrate how the platform solves the case in real-time:

STEP 1: LOAD PHYSICAL LAYER (SPATIAL ISOLATION)

Show the map view with CCTV spottings loaded. Emphasize that the suspects are scattered across DXB Airport, Wafi Mall, Jumeirah, and Al Bustan Rotana. On paper, they have zero geographic overlap.

STEP 2: LOAD TELECOM CDRS (ZERO DIRECT EDGES)

Query direct phone connections between any of the 26 suspects. Point out that the system returns **0 edges**. Explain how standard link analysis fails because no local calls were made.

STEP 3: EXECUTE GRAPH CENTRALITY QUERY (THE 'AHA!' MOMENT)

Run the *Common Neighbor / Centrality Query* on all active Dubai burner numbers. Watch the platform automatically collapse all 26 scattered nodes into the single central Austrian landline node (**+431000000000**).

STEP 4: OVERLAY FINANCIAL INTELLIGENCE (LOCKING THE CASE)

Add the financial transaction layer. The system instantly groups the 26 passport identities into two prepaid BIN clusters (**HASH-US-MIAMI-882** and **HASH-US-DELAWARE-401**), proving that despite using 26 different passports and 4 different flight paths, they were financed by a single state-sponsored entity.
